

Aula M3A47 OTIMIZACAO MODELO I

Leitura complementar:

- [3.2. Tuning the hyper-parameters of an estimator](#)
- [Hyperparameter Optimization for Machine Learning Models](#)
- [Grid Search for model tuning](#)
- [sklearn.model_selection.RandomizedSearchCV](#)
- [Comparing randomized search and grid search for hyperparameter estimation](#)
- [A Conceptual Explanation of Bayesian Hyperparameter Optimization for Machine Learning](#)
- [Hyperparameter Optimization With Genetic Algorithms In Kotlin](#)
- [Cross-Validation and Hyperparameter Tuning: How to Optimise your Machine Learning Model](#)
- [Grid Searching in Machine Learning: Quick Explanation and Python Implementation](#)
- [A Top Machine Learning Algorithm Explained: Support Vector Machines \(SVM\)](#)
- [1.4. Support Vector Machines](#)
- [What Is Grid Search?](#)
- [Cross-Validation in Machine Learning](#)
- [Use of Cross Validation in Machine Learning](#)
- [Gridsearchcv](#)
- [Using GridSearchCV](#)
- [Machine Learning: GridSearchCV & RandomizedSearchCV](#)
- [sklearn.model_selection.StratifiedKFold](#)
- [sklearn.model_selection.GridSearchCV](#)
- [Cross Validation and Grid Search for Model Selection in Python](#)
- [Grid Search Optimization Algorithm in Python](#)
- [How do I make GridSeachCV work with a custom transformer in my pipeline?](#)
- [GridSearchCV for Beginners](#)
- [GridSearchCV or RandomSearchCV?](#)
- [Grid Search for Hyperparameter Tuning](#)

- [Beginner's Guide to Data Science Pipeline](#)
- [What's Data Science Pipeline?](#)
- [Overview of the Data Science Pipeline](#)
